5.18 Send to Twitter

To the official Apple Maps app.

Free version which only allows 1 photo and no Deals compared to the Enhanced version.

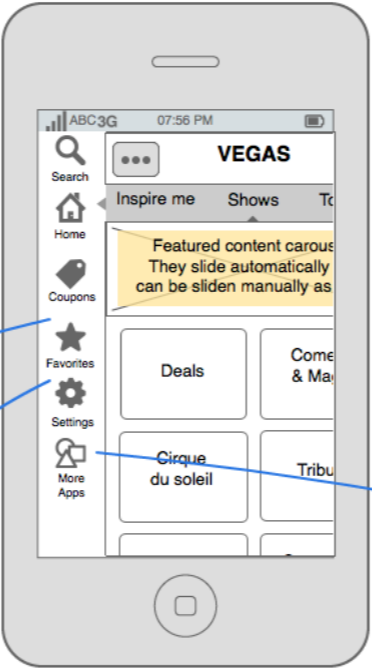

As you scroll up and down the list of elements, the map would move to each one of the pins to always display the elements that is on top of the list. This way we have a dynamic way of showing the position of each element in the map automatically without having to either scroll and move the map manually. Look at "Now" app to see it working.

As you scroll up and down the list of shows, the map would move to each one of the pins to always display the show that is on top of the list. This way we have a dynamic way of showing the position of each show in the map automatically without having to either scroll and move the map manually. Look at "Now" app to see it working.

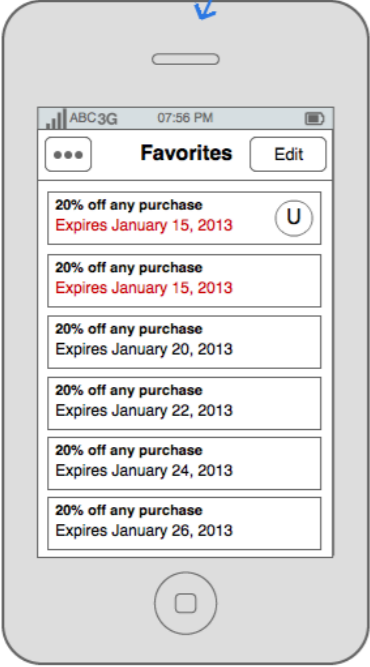

The eyeball in this screen would only show the Filter and Sort options, since we already have a map in the screen.
